NEWS RELEASE
TUSK PRODUCTION UP 10% WITH GPP AT GAGE

Calgary, Alberta, September 19, 2006 – TUSK Energy Corporation ("TUSK") is pleased to report that the Alberta Energy Utilities Board ("AEUB") has granted Good Production Practice ("GPP") status on the TUSK operated Gage oilfield near Fairview, Alberta. Prior to GPP, Gage was producing an average of approximately 230 boepd net to the TUSK 50% interest. With GPP, production at Gage is expected to increase more than 50% and total corporate production will increase approximately 10%.

The Gage oilfield is a significant part of the producing assets of TUSK on the Peace River Arch ("PRA") and the grant of GPP status provides up to five infill locations, at least two of which will be drilled prior to the end of the calendar year.

TUSK CONTACTS:

Norman W. Holton
Chairman and Chief Executive Officer

Earl T. Hickok
President & Chief Operating Officer

Gordon K. Case
Vice-President Finance & Chief Financial Officer

Forward Looking Statements - Some of the statements contained in this news release are forward-looking statements. Forward-looking statements may include, but are not limited to, statements concerning estimates of recoverable hydrocarbons, expected hydrocarbon prices, expected costs, statements relating to the continued advancement of the Company's projects and other statements which are not historical facts. When used in this document, and in other published information of TUSK, the words such as "could," "estimate," "expect," "intend," "may," "potential," "should," and similar expressions are indicative of a forward-looking statement. Although TUSK believes that its expectations reflected in the forward-looking statements are reasonable, the potential results suggested by such statements involve risk and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements. Various factors, which could cause actual results to differ from these forward-looking statements, include the potential that TUSK's projects will experience technical and mechanical problems, geological conditions in the reservoir which may negatively impact levels of oil and gas production and changes in product prices and other risks not anticipated by TUSK or disclosed in TUSK's published material. Since forward-looking statements address future events and conditions, by their very nature, they involve inherent risks and uncertainties.
